Comments: I do not support this revision. I am a born and raised Alaskan who has used these areas for hiking, biking and camping my entire life. I and the many many backcountry users take utmost care when riding in these areas because we all want to preserve it for generations to come. We do not need a regulation to change this. I have a young son who will grow up with these same values and principles on how to love and respect the land while recreating in it. I cannot imagine an Alaska where I do not have the opportunity to "get lost". THIS IS WHAT ALASKA IS ALL ABOUT!

I am also very concerned about safety of my fellow recretors. Our trails serve as emergency access routes for first respondents to any motorized or non-motorized incident. Closing access will hinder these efforts.

Warmer winters in Alaska are affecting user access. The EIS/Forest plan do not bring solutions forward to address this issue. For example, Lost Lake often is closed to motorized use when there is more than adequate snow cover 500' up the trail.

PLEASE DO NOT PASS THIS.
