Comments: Please do not further restrict snowmobile/snowmachine usage. Riding areas have already been cut to a fraction of their size in the past few years and groups continue to push for more restrictions. Frankly the idea to cut down one of the top riding areas in the world is asinine, I have been riding these area for years and would like to continue to for many years to come. In addition snow machines continue to become more fuel efficient and quieter. This is Alaska we backcountry ride with snowmachines, get over it.
