Comments: I have recreated in the Chugach national Park my whole life. With and without the use of motorized vehicles. I believe that it's important to have areas open to motorized used for a variety of reasons. Accessibility to people whom want to enjoy the park but are physically limited, the ability to ride back country snow on skis or boards at the rate of Hell guided customers at a fraction of the expenses, and a generation of outdoor enthusiast enjoyed the park with motorized use before my generation and I want the next generation to have the opportunity to have similar experiences. I have two young children now and have taken a break from the mountains but it would be a disappointment if I lost that liberty.
