Comments: These lands were acquired for the restoration of wilderness values and must be managed "in perpetuity for conservation and wilderness purposes," as promised when they were purchased. The Plan must protect the "wilderness character" of the WSA, not the Forest Service's weak proposal to protect just its "existing character." Furthermore, the Plan must protect the wilderness character of the lands in the WSA by classifying all of them with the Forest Service's "Primitive" standard, which is the most protective standard in the agency's recreational classification system.
