Comments: To whom it may concern,

I have lived in Alaska my entire 27 years of life and could never imagine living anywhere else. I have had so many fun and memorarible times and most every one of those experiences was in the Chugach on my snowmachine. Snowmachining in the chugach has kept me out of trouble through high school and to this present day. It is the best escape from all the hardships we go through in this life. I respect the land we live and recreate on because it is everything to me and hopefully will be everything to my children as they get older. Please consider all the lives that will change with this revision.

Thank you for your time,
Peter
