Comments: To Whom it may concern:

A reduction in land available for use by motorized means will have great negative impact on myself and my family. Please to not take away the means I have to show and explore the CNF. My daughter loves snow machining with me and I want her to see all of the things I have seen from a snow machine. If a decision is made to reduce further the areas of riding available to the public this would negatively affect many people that I consider family.
