Comments: I grew up in Soldotna and my friends I have been riding in the back country all over Alaska. We have always been responsible as far as taking out whatever we bring in and not disturb the natural terrain. We all run stock exhaust to prevent noise pollution as much as possible.

We would all be very disappointed to see more areas shut down to motor vehicles due to the fact that we are all pretty limited as it is even though we are making an effort to be environmentally conscious.
