Title:

Comments: I am a avid user of motorized public land use. Motorized public land use is actually the reason I moved to Saratoga Wy. My local community thrives on motorized use we actually had a major decline in our local community due to a smaller snow fall in recent years. I realize that I'm very far away for my opinion to dictate your decision, but it has been my dream to ride my sled in Alaska for years. I hope this is an option in the future. I also fear that taking privileges like this away spreads like cancer once a president is set. It is my opinion that less regulation is better and public land should be used by all the public motorized or not. Thanks for your time.
