Comments: In regards to the acreage in the Chugach Forest Plan Revision, Plans C&D are unacceptable. These options will have a devastating effect on the local communities and culture keeping thousands of users and families out of the range. By creating more wilderness you are limiting the family experience. Simply put, grandma/grandpa and young grandkids are kept out of the area because of the difficulty of access. Emergency Services are also hindered by shutting down routes of access. We need to keep these areas open to ALL uses. Motorized and non motorized, along with logging, prospecting, etc. There is already a vast amount of acreage in wilderness. Vote NO to more wilderness!

Thank you for your time.
