Comments: These lands need to be kept open for all users! There is no reason any one user group should have special privileges. If any changes are made A or B are less restrictive, C and D are completely unacceptable. Motorized users do almost zero impact in the winter and most likely would rather be away from the road system completely but they need access points and parking. Very unlikely that non motorized users would make it very far off the road system at all in a day. To say they don't like the noise is ignorant because there is constant road noise from vehicles all day long. They simply can not travel far enough away from the noise in a day.
