Title:

Comments: I recently was informed that there was a potential for closing the above mentioned area to mechanized use. I'm an avid outdoor enthusiast and partake in many out door activities which include but are not limited to snowmobiling, ice climbing, rock climbing, fly fishing, dirt biking, and hunting. I believe that any time areas get closed to mechanized use we are removing a very large number of peoples rights to enjoy that area in the way they would like. Please don't let a group of people take the rights away from the rest of us to enjoy the back country. Equal access is the only fair way to enjoy OUR public lands. I would eventually love to travel to AK to snowmobile this range and closing it to mechanized use will negate one of my dreams and bucket list items.

Thank you,

AJ Beasley
