Comments: After reviewing the draft plans and based on years of experience in the backcountry of the Chugach mountains, I must write today to oppose any sort of Motorized restrictions for the Chugach, Kenia or Copper river basin areas. I find it appalling that snowmachiners have been so severely restricted from lands that are rightfully these to recreate on just the same as any other group. Myself and my family spend much of our winters recreating in the Chugach and feel that the burden of additional restrictions would bring economic harm to the area. I strongly support the opening of additional avenues into the backcountry to allow all alaskans the opportunity to explore.
