Comments:

I am in favor of leaving all of it alone as much as possible. There is less and less of these areas covering this earth and doing the cleaning and filtering job they are supposed to do and we need to keep these areas as untouched as we can.

Put a stop to any illegal cutting. Keep it wilderness. No roads added. Allow it to support the wildlife that depends on these areas to be able to move freely in sometimes large ranges they really require to keep the land healthy. Fresh water is important to all and the fish running through it only increase when the water is clean and abundant.
