Title:

Comments: We rely on our goats for milk and meat and would be devastated if they were not available for us anymore. This area and our state desperately need to be more food secure and local farms are helping move us in that direction. The idea of removing goats and/or sheep from this would not only be detrimental to our food security it would be very damaging for 4H and FFA. These kids are taking an interest in where their food comes from and trying to promote a lifestyle around agriculture. That will no longer be an option if this is allowed.
