Title:

Comments: I request that you do not close down any of the listed areas for snow machines or other motorized usage. For years we have used the area for snowmachining and we work hard every year to keep the area clean. The area is one of the largest and best place on the peninsula and shutting it down would put a lot of the community in a very tough place considering not all of us are able to travel as far north as it would be necessary to enjoy the winter sports. I hope you hear our plea and keep it open! Thank you for your cooperation.
