Comments: Central Idaho River Protection

To whom it may concern,

I am a paddler here in Idaho and am making it very clear that myself and many other river paddlers are opposed to the "suitability" business being illegally pushed onto the Forest Service. There are many of us, and we will continue to speak out against taking down protections of our precious and vital ecosystem. If the issue persists, further action will be taken to protect the natural land we all enjoy.

Sincerely,

Travis White
