Comments: Please keep these lands open for motorized use. I have newly discovered the use of snow machines to access the Alaskan backcountry and it has made me appreciate this beautiful state even more. It makes one understand and value what they have and work even harder to keep things as they are. The people that use these lands appreciate what they have. They will continue to keep the backcountry pristine and they will continue to do whatever needs to be done to keep these lands open. Taking these lands away from us will only prevent people from knowing how lucky they are to be able to recreate in such an amazing place.
