Title:

Comments: Hello, first thank you for your time and consideration in this matter. My name is James Stevens and i am a snow machiner and snowboarder that frequents Alaskas vast back country. I do so responsibly anything packed in is packed out and that goes for the team of guys a ride with. It is the ut most importance to myself and many others that we leave the back country as beautiful and we found it. The thought of not being able to access these areas not only is upsetting but as well as saddening.

Keeping the back country motorised freindly is important for safty and well as recreational. I myself have seen firsthand the importance of motorized snow machines, I was snowboarding and was cought in a large avalanche and if it wasn't for a snowmachiner that could respond to me with little time I wouldn't be here today. I thank god evey day i am alaise because of a snowmachiner. I hope that it stays that way. Thank u again for your consideration and god bless America.
