Comments: Hello, I am a fellow Snowmobiler/snowmachiner (Sledder), and I wanted to lend my voice to keeping areas open to snowmachining as this is a net positive to our environment and the ability for people to get out and explore and appreciate our vast outdoor spaces.

There are so many areas that we cannot access or that are already closed to the public, that it is a shame when new areas are closed and further restrict snowmachiners the opportunity to enjoy these open spaces.

I believe that snow machines have very little impact as they are on snow, and that the winter activity that friends and families are able to enjoy together is what our country and world needs more of.

Thank you for your consideration in keeping this area open to snowmachining.

Sincerely,

Eric Vaughn

Sandy, Utah
