Comments: I would like to know how you are able to infringe on people's civil rights to grow their own food? If you ban domestic sheep and goats from these areas that are owned privately and farmed responsibly you're then taking people's rights away. How about dogs and cats get banned in the whole state because they may or may not carry disease. Better yet how about hunters that come in from out of state and pay huge bucks to hunt wild sheep get banned because they may bring disease and spread it from their waste they leave in the woods.
