Comments: To whom it may concern,

I am a life long Alaskan, and have been living in south central alaska since 1994. I spend the vast majority of my leisure time recreating in the Chugach National Forest, enjoying everything from hiking, fishing, and whitewater rafting (non motorized use) to snow machining, ATV/UTV adventures, and jet boating (motorized use). I don't believe option C and D are viable options, and would like to see option B voted in. I believe option B is the best plan to help guarantee access to this beautiful area of the state for our future generations to enjoy, and I believe both motorized and non motorized users can continue to use this area in harmony.

Thank you for your time,

Phil
