Title:

Comments: I am a life long Alaskan residing on the Kenai Peninsula. My family and I have enjoyed the Chugach Forest year round including hiking, mountain biking, camping, winter hiking, snowmobiling, etc.

I feel the plan should not change, Alternative A allows for the most diverse option for recreational use. I personally feel that winter motorized and non-motorized use is balanced. The non-motorized use can be used in the motorized use and actually allowing more easily accessed areas due to the snowmobiles creating trails.

The management already does a fantastic job of managing the open/closing of trails to protect the vegetation/trails from inadvertent damage from motorized use.

Snowmobiling is one of the main things that I love about the Chugach forest. There is no better way to access this terrain than this. Please don't change what we have by restricting it even more.

Sincerely,

Thomas Donaghe
