Title:

Comments: The limitation of access makes little to zero sense.

1. Chugach National Forest is located in the most heavily populated area of the state:

A. Snowmachines represent the lowest impact on terrain.

B. Restricted access will require more travel to approved riding areas exposing more people to hazardous travel during winter.

C. Snowmachines/all terrain equipment are the primary methods of transportation for many people.

D. Limiting hunting will have negative impact on wildlife.

E. We/I represent a large part of the political spectrum and will not accept restrictions without adverse political consequence for forestry.
