Comments: Dear Sir,

Thank you for the chance to comment on the Chugach National Forest Draft management plan. I strongly request that you select alternative D to manage the 1.84 million acre WSA. I want the forest service to manage the wilderness study area under the "primitive" category.

The Nellie Jaun WSA was purchased as replacement wilderness habitat following the Exxon Valdez oil spill. Do not manage this WSA under an existing condition but rather as primitive wilderness. STOP allowing the removal of trees along beaches. Do not allow anymore motorized equipment within the WSA. Please keep the promise that this 1.84 million acre WSA managed as replacement wilderness. Keep your promise.

Thank you for reading my comment letter and carrying out my request.

Sincerely

James Woods
