Comments: I support Motorized use on the Chugach Forest both winter and summer. Without the mototized use the vast majority users could not get out and enjoy the beauty of the great outdoors. Many users of the forest are not able to get in the back country because of physical limations without the use of motorized transportation, both summer and winter. Without the motorized use a very small user group would be the only ones allowed to enjoy the back country of the forest and that is not what the forest was established for, it is for all to use. Thank You for your consideration. Dan Estes
