Comments: Mr. Ludwig,

With the Eagle River Valley suffering from a drought on and off, mostly on, going back to 1997, I find it highly irresponsible for Vail Resorts to be asking for any increases in snow-making at this time.

They may call it needed for 'circulation routes and high use areas', but as we all know, especially after this past year, the season is getting shorter and shorter, with the season starting later and ending earlier every year (Or at least with the good/excellent conditions we had grown to be accustomed to in the past).

So, if there looking to supplement the lack of snow and shorter season, WHERE IS THE WATER SUPPOSED TO COME FROM!!!??

The natural snow comes from the sky and the local rivers, which as we both know, have been in short supply as of late.

Dave Wineman

35 year resident of the Valley
