Title:

Comments: I urge sustained protection of the wilderness character of the Nellie Juan-College Fiord WSA with the primitive standard used for the whole of the area. I support proposed Alternative D with inclusion of those lands originally within the WSA that were purchased for restoration following the impact of that major oil spill. I urge strong protections of the land from wilderness violations through any and all activities within the area which diminish the natural values of the land. I fervently support this place as holding remarkable wilderness values that warrant a full and free future. This is all the more critical given the nature of climate change already impacting Alaska and her wildlife. Thank you, Mark Meeks
