Comments: I strongly encourage the Forest Service to adopt Option D to maintain the entire wilderness study area of the Chugach National Forest and coast of Prince William Sound, and recommend full wilderness designation for the areas.

The Chugach is a special place and the wilderness study area as defined in Option D will see that wild area persist into the future. As there are few conflicts with industry, this is a great opportunity to move forward with sustainable jobs based on wilderness exploration, ecotourism and hunting.
