Comments: Keep all as is.

all the reasons stated for change are poor excuses.

Keep our forests open for the people & multi use.

the "thinning" the forest & than locking the forest up forever is not explained.

the spotted owl has been debunked...why is that owl been dredged up again.

the marbled murrelet somehow survived men's "1900s" on=slaught into the forests.

Suggest starting over on your reasons for closing the forests & roads and humam

traffic from those 5,000 acres.

when I saw the northern spotted owl as threatened & old growth this & that...

I knew the proposal was one sided.

so again. Leave all alone.

thank you.
