Comments: Thank you for allowing me to comment on this revision. I have spent many hours riding and recreating in the Chugach since 2014. I would like to see more areas opened up to motorized use, as I've never seen any harm to vegetation. Most wildlife move out of the high country for winter and respectful motorize users rarely run into them. I personally don't like any of the plans put forward due to the lack of access given to the motorized user group. Plans A or B would be acceptable if we weren't losing Carter/Crescent area. Please consider increasing areas for motorized use or give valid reason why to shut it down. Modern snowmachines have little to no noise or exhaust emissions and are lighter weight making no impact on vegetation.

Thank you
