Comments: I would like to say that I support plan B of the management plan. Restricting any of the current access that we have would be devastating to those of us who live in the outdoors year around. Restricting access to these places will only put more limitations for those of us who truly enjoy them. I would love to see better access points out in for nelly Juan and the lost lake area. By improving these access points we can make sure that the habitat is preserved around it.
