Comments: I've been riding Alaska's back country on motorized vehicals for over 40 years. All my kids grew up riding theses same areas. I feel any loss of these areas or limitations of access would be an absolute shame and would deny my youngest children and my grandchildren the rich culture that I grew up enjoying. I feel the economic impact would be negative. I support option B and encourage anyone that has seen Alaska's backcountry using motorized vehicles do the same.
