Comments: Land management,

This is my second comment I miss some things on my first comment. I really wanted to talk about safety in the chugach. I enjoy a lot of time riding at Carter lake area my family and I rides there a lot because of ease of access. The first time I took my wife snowmobiling was snug harbor she was my girlfriend at the time. I still can't believe she still rides snowmobiles with me. I know she loves it because of the beauty of Alaska and other wise she would not be able to access those areas. I would like to see wider trails to provide more snow on the ground. Ice conditions can be vary dangerous the better the snow pack the safer it is. Snowmobiles are quieter and more efficient than ever and get better every year. Improving trails into these areas should be a priority for all out door users to see the next generation of out door enthusiasts enjoy our great land.

Thank you for your time I would like to see prop b with changes to add more riding area

Jacob
