Comments: As a life long Alaskan and outdoor enthusiast, i feel it is my obligation to write expressing my interest in keeping motorized winter recreation open in the park. I have enjoyed snow machining for 2 decades now, with friends and family alike. The park offers a place close to home for those not able to travel long distances. It offers revenue to many local businesses which is vital for some families during the hard economic times the state is facing. I personally look forward to taking my son and daughter out to experience the same things I have over the years. One last point I'd like to make is about the avalanche education that is put on numerous times a winter in turnigan pass. Its extremely important for the community to be able to participate in these learning opportunities.
