Comments: I feel it would be very detrimental to our community to reduce the motorized access to our lands. Therefore it is my opinion that option C or D should not be considered. Also I would ask that very little value be placed on comments from outside of Alaska, as most of these people have no idea what life is like up here. I have lived on the Kenai Peninsula my entire life and have not explored half the areas open to motorized use. As I get older not having the option of riding into areas would make it much harder to enjoy the beauty that is Alaska, and reduce my ability to share it with our next generation and visitors from outside AK.
