Comments: I regularly ride my snow machine in Turnagain pass and surrounding areas (placer, lost lake, Johnson pass). I would love to see more area opened up to motorized winter sports, there's less snow at lower elevations then there was 15 years ago and the latest models of snow machines are designed to do the least amount of damage to the terrain at all. I am born and raised Alaskan native and am sick and tired of losing more and more land to ride because people not from here think they know what's best for my home state. Stop limiting people's passions please.
