Comments: All,

For the last 26 years I have been accessing the chugach national forest by motorized vehicle. The thought of taking away the few spots we are allowed to ride is asinine. Between myself and many others here in the state of Alaska riding motorized vehicles is what keeps us here. If I wasn't allowed to ride zones anymore like your option C & D show, there would be no point in me living in this state anymore. Being born and raised in Alaska riding motorized vehicles is something that is part of our way of living. Taking away motorized use would cause a huge impact to our state. I support option B.

Hayden MacDonald
