Comments: To whom it may concern;

Unfortunately, I have little faith that this specific, nor hundreds of other personal comments, will in deed be read or considered. I do feel compelled to express my position, that I adamittaly oppose any change to the current cnf land use plan that will lead to any addtional restriction on motorized use. The current plan is sufficiently biased and one sided enough toward non motorized users. All the debatelly aspects aside, at the most basic level, this, and all federal agencies should be in line with our constitution supporting equal opportunity for all, regardless, of race, religion; or in this case, recreational preference regarding use of motorized vehicles.
