Comments: Hello I have been using the Chugach for winter recreational activities since I was 16. I love exploring the vast areas and enjoying time with my buddies. Motorized access in the winter does not harm the area and it provides friends and families many hours of enjoyment, fathers have raised their sons in those hills teaching them life skills and spending time together. Please support plan B so that someday I may take my children up there and show them my favorite places. Please do not let outside interests ruin our way of life. Let the people who use the area have weighted input over those out of state environmentalists who have never seen this area or ever will see it as some these areas can't be accessed any other way than snowmobiles.
