Title:

Comments: Hello and thank you for all your work for our parks,

My name is Morgan Provost, I grew up in Naknek, AK in the heart of Bristol Bay and understand the importance of our national parks. I also understand the importance of traditional and recreational motorized use in our vast state. I have lived in Anchorage now for the past 16 years and have been recreating in the Chugach since. I feel that plan C and D would give this area a crutch on future development for a growing number of recreational users and our children's economy. The growing numbers of people recreating in this area demands growth. I hope to see more growth in what we have already, Lost Lake is a perfect example how we need to widen and maintain trails to accommodate everyone. I would love to see a trail to the Nellie Juan Lake in our future as well. I believe we can all work together with this park to make it as great as it really is for our children to enjoy in the future.

I would also like to touch down on the economical side of things here. I work as a union pile driver in the great state of AK and have the pleasure of building most of Alaska's marine infrastructure all along our coastline. I have built docks in every town in this Chugach area in the past 16 years and hope that my children and yours have the opportunity to do the same. Mining and logging in Alaska is how we started and is what we will always have for our future.

I trust that you will all make the best call for what is best for Alaska and I thank you for all your work you do for our parks.

Thank you -Morgan Provost
