Comments: My family and I use the Chugach National Forest many times a year. I have enjoyed hunting, fishing, backpacking, day hiking and snowmachining in the forest. My wife, daughters and I have had such memorable snowmachine trips in the forest. I couldn't imagine not having access to such a staple of our winter tradition. I vote for option B (no change to motorized areas). Snowmachining has virtually no impact on the forest and shutting down any motorized area is unacceptable.
