Comments: I SUPPORT PLAN B

I believe taking away motorized use areas will hurt more people. So many people use these motorized areas for so many things: For many of US it's calming (recharging) the soul in a very hectic world, relieves cabin fever lowers depression felt by so many that live here. It also allows me and so many more people the ability to access these areas and enjoy them that otherwise might not be able to. They should be allowed access areas to ALL shared.
