First name: Kyle

Last name: Klaus

Organization:

Title:

Comments: Options A or B seem more reasonable than C and D. The fact is that interest and use will only continue to expand as populations grow. We have to come up with models that allow people to access the lands and areas. By restricting access to some demographics the entire community suffers. As outdoors enthusiasts we are all in this battle together against the sedentary screen ruled lifestyle. Please do not damage our collective cause more by restricting access means.
