Title:

Comments: We moved to Alaska 10 years ago to enjoy the amazing outdoors and all this great land has to offer. We left a state, Oregon due to the increased restrictions of our land and personal use. Here we find the powers at be are at it again, wanting to restrict "our lands"! Enough!, we enjoy and use the land to hunt, fish, hike and in order to get to some of the places that we enjoy we have to ride atv's or snow machines depending on the time of year. For our family personally to put food on our table we would not be able to do this without the use of motorized vehicles. My husband and I in our 50's and 60's are not able to hike in 20+ miles to hunt and then able to pack it back out. So this would impact our family! We have been all over the State to do what we love as well as purchasing property in the Caribou Hills and building a cabin to be closer to the things we love to do! If areas are closed then there will be no reason to go so that will mean small business' will not receive our dollars. Closing areas will also mean more pressure on those that remain open. We Do NOT want areas restricted. We are in favor of maintaining or increasing access to "our lands"
