Comments: I have lived and been in Alaska all my life, excluding college. After college I decided to move back up because I love Alaska so much. I use the Chugach National forest all year round. I snowmachine in the winter and hike and bike in the summer. I love to use the cabins that are available to rent in the summer and winter. Closing off more areas for the public to use would be devastating. We are already limited on places to snowmachine due to lack of snow. The mountains are the place to go in the winter time and we need the places to go. I would be lost if I can not have the access to bike, run, hike and snowmachine in the Chugach National Forrest.
