Title:

Comments: We as Alaskans that love the adventure of enjoying seeing and experiencing the beauty of our great state on recreational transportation are seemingly constantly losing freedoms of being able to do so. This great land is the people's land. Everytime we turn around, something of this that so many of us enjoy is being threatened, regulated ortaken away. We come from long lines of recreational family & background that we pass on to & share with our children & grandchildren, so they can also love, enjoy & experience this wonderful lifestyle. Children who don't have something like this, that they love & are passionate about often get in trouble & take a bad path. Please do not deprive & take such a great, healthy, enjoyable family passtime & deny our future generations, as we as citizens should be able to have many places to see & enjoy. I highly recommend option B, as I'm sure most who share this same love & enjoyment. Please stop the regulating & cutting off Alaskans from our great lands. Thank you for your time & consideration.
