Comments: How does this Plan address those private lands within the project scope? Will treatment of private lands be an option for property owners? Are credits or considerations available for those landowners who have/are addressing the WUI issues?

I wish to see specific language addressing WUI on private lands. In particular, is a fee going to be assessed on the property owners wishing to be included in the Plan? Can a VMP prescription burn be executed by a private landowner during the spring or the fall?

Thank you. I look forward to discussing these, and other issues with you.
