Comments: Draft Land Management Plan Comments

Greetings,

I inadvertently left out my support for a management option in my comments submitted on Oct. 30.

Please add my support for option D with it's additions to my comments.

Thank you.
David Janka

Thank you for this opportunity to comment.

Please keep wilderness status, protections and monitoring throughout the entire Wilderness Study Area within the Chugach National Forest.

It is a Wilderness Study Area not an Existing Character Study Area.

I am concerned that some areas presently in the Wilderness Study Area may be removed from wilderness recommendation and oversight. If anything areas should be added not removed.

Do not erode the management directives of the Exxon Valdez Oil Spill (EVOS) purchased lands and easements in any part of the Chugach National Forest. All lands acquired through the EVOS purchases are to managed in perpetuity for conservation and wilderness purposes.

Over 100 years ago the primary purpose for the original creation of the Chugach National Forest was for fish and wildlife habitat protection. Please do everything possible to meet and sustain that legacy.

I agree with and support the comments of the Prince William Sound Stewardship Foundation as well as those submitting by Tim Lydon.

Sincerely,
David P. Janka
