Title:

Comments: I have been skiing in Vail since 1976 and after I retired moved here full time. So I have been through the good years and the dry years but the past two years have been particularly bad and with the climate changes will become more frequent. I fully support Vail Resorts proposal to increase their snow making on Vail Mountain to cover the Mid Vail area to considerably increase the acreage early in the season. Last season there was only one run for quite a while which severely impacted the number of visitors and activity in the area. This directly affected the livelihood of many when their anticipated jobs were delayed in opening up and the local businesses suffered. Please approve Vail Resorts proposal which will dramatically change Vail Mountain's opening scenario.
