Comments: I am writing as a hiker and a skier using many of the areas described in the project. I am in support of a recognized closure order for motorized vehicles in Bear Basin especially near the ski and bike trails. I also support changing the status of Granite Mountain from Temporary closure to Permanent Closure to motorized vehicles. Bear Basin is a known habitat for Great Grey Owls which should carry weight when considering logging and riparian restoration. Improved and specific trail signage would also allow less confrontation between hikers, bikers, and motorized users. Thank You.
